

Before - After

Funicular S. João

41.900 passengers /month. The elevator starts down at 568m, near the train station in Mateus Fernandes' Avenue, and arrives close to the center at level 630m, in a distance of 200m. It has capacity for 15 people and the journey takes about 3 minutes. The investment was a million and a half euros.

Before - After

Public garden Lift

36.000 passengers /month. Two vertical public elevators connect the Public Garden in the centre (665m in height) with Avila and Bolama Av. (620m) and a long pedestrian bridge that crosses the valley to north. There is a stop half way at a resident housing area. Both lifts can take 11 people. The investment was 650 thousand euros.
