

ON THE ROOF / NA STRECHE

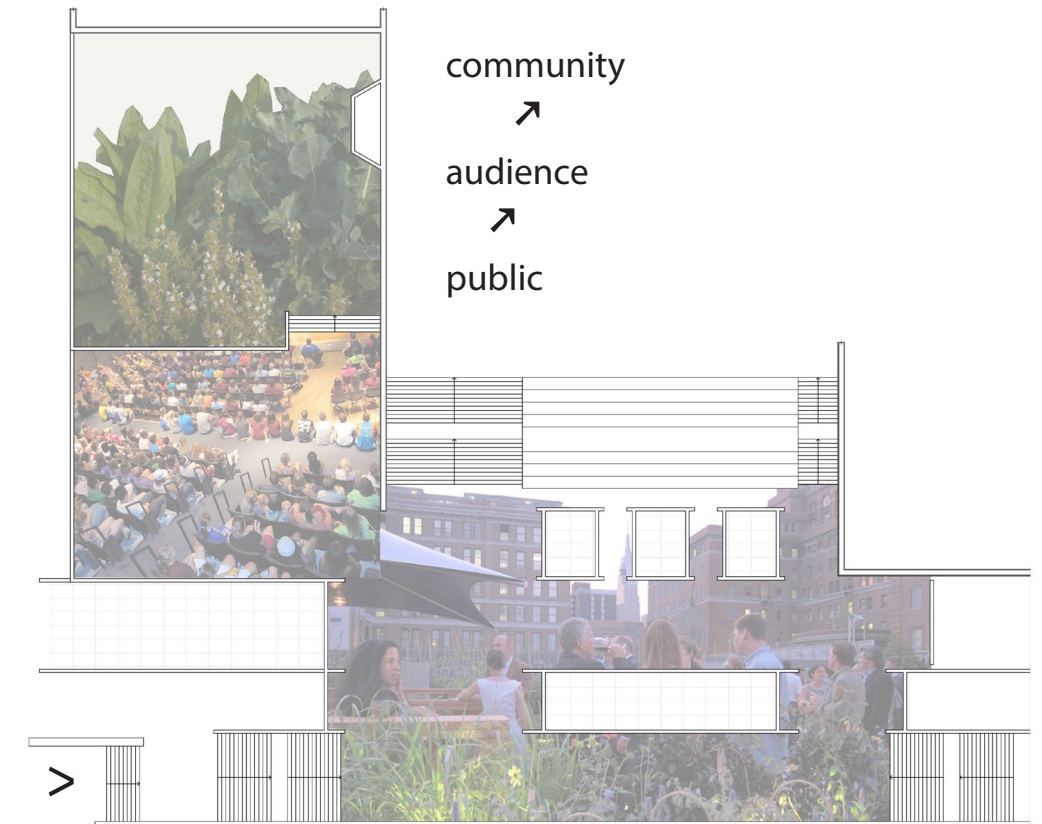

Bratislava, Slovakia

The goal of the volunteer initiative was to create a rooftop garden that would serve as a prototype of a sustainable, experimental, communal space in order to raise ecological awareness, reconnect local actors and communities and to encourage social inclusion, while proving the value of participatory planning and production of urban space.

area of 2000 m² was proposed for transformation

< state of the premises before the intervention

the proposed placemaking concept embodied diverse user involvement levels

< mapping of neighbourhood communities

The aim of the project of rooftop community garden, first of its kind in Slovakia, was to enable the local communities to rediscover the formerly locked-off and nonfunctional rooftop landscape of the modernist monument of the 'inverted pyramid' of the Slovak Radio building.
