

Ideas workshop with members of “Lacul Tei” Group of Civic Initiative

Building workshop together with students and volunteers

Inauguration day

A Place in Tei

Following a workshop attended by the members of the “Lacul Tei” Group of Civic Initiative, we sketched two scenarios that outlined the residents’ access to and involvement in the operating mechanisms of a park from their neighbourhood.

Together with the administration we chose one of the ideas, and the structure was built on site, with the help of volunteers and students.

The Group is now using the Equipment as a means of communicating with the community (info panel and the postal box).
