

The purpose of the project is to revive the historical center of Kyiv, as a public space with a modern infrastructure and available for general use. The project is aimed at the cultural development of society and improving the quality of leisure for the citizens and visitors of the capital.

We believe that before designing the public areas it is important to study the history of the place, perform a detailed analysis of the territory to identify the main tasks and ensure active participation of the community.

This is a vivid example of the fact that even such a historic area in the center of Kyiv can be abandoned. Until the citizens understand that it depends very on them how the city in which they live look like. When people stop being indifferent to what surrounds them, they will understand that together they can achieve good results, then our cities will become beautiful. We believe that this example will inspire people not to be indifferent and to move to actions for the sake of a better future for our country.

RENOVATION OF STAROKYIVSKA MOUNTAIN TERRITORY
