

■ Project location   ■ The boundaries of the world's heritage site guarded by UNESCO

Starokyivska mountain is a historical place in the center of the capital of Ukraine. Very in this place the prince Kyi founded the city of Kyiv.

The first rock Christian temple of Ancient Rus, – The Tithe Church, was located on the territory of Starokyivska mountain. It was built in 989-996 by prince Volodymyr the Great. Holy thing was completely destroyed by mongol-tatar in 1240.

In the eighties of the 20th century, the historic-archaeological and architectural complex of the «Ancient Kyiv» Park Museum was created on this territory. It was done under the project of architect Avram Miletsky.

From 2005 to 2011 the archaeological research of the Tithe Church's foundations were carried on the site. In summer of 2015, the NGO «Initiative for St. Andrew's Passage», with the support of the local community, demolished the construction fence and executed tracing of the Tithe Church's foundation, which was opened at the end of 2015. General condition of the whole Starokyivska Mountain remained unsatisfactory. Even after dismantling of the fence, new tracks were laid by familiar routes, as if the fence is still there.
