PERE GRAU AREA ACTIONS: ESPAI (E)CO & COVERAGE OF THE SPORTS COURT

The second action contemplates the **coverage of the sports court** with the aim of generating a **new polyvalent space** with a sportive character, but above all social and cultural, protected from the rain and protected from excessive sunshine in the summer.

This work, due to a very strong local reinvention, has generated many expectations in the neighbourhood and will allow the **reappropriation of the 'Espai Pere Grau' community**.

The implantation of the prototype (e)co, has allowed to **reconfigure the boundaries** of the area generating new facades and **giving a certain character of a square**, blurring the back condition that impregnated this space (previously used as parking lot).

THE NEW POLYVALENT SPACE

NEW OPORTUNITY
