The park has many opportunities for outdoor study and leisure. Image: Adam Mørk

The combined bike rack and bench design do not only provide parking for 2400 bikes but also create informal meeting spaces.

SUND Nature Park re-establishes elements of Copenhagen’s old Grazing Common from the 1840s with the use of native plants such as thorn bushes, nature meadow and oak trees.

Innovative bike solutions and a large underground bike parking space are designed to also integrate informal stays, increased biodiversity and climate adaptation. Image: Adam Mørk

Besides from being an attractive and health-promoting campus and research park, SUND Nature Park is open for everyone in the neighbourhood to enjoy.

The zig-zagging pathway offers a joyful and lush connection through Nørrebro. Image: Adam Mørk
