

Creation of navigation elements, park rules, permanent Friends' Club

Negotiation with Slovyansk City Mayor, regular events, retro photo exhibition

Workshop for kids to create the playground, which was installed later in the Park

Anyone who is not indifferent to the park development can join **the Friends Club** of the park by participating in activities (park cleaning, planting flowers) or by making a kind donation in the park development. Members of the Friends Club were involved in the reconstruction of the park from the very beginning of the project. Currently, they continue to develop public space, conduct cleaning, organize movies screening and holiday celebrations.

Children's playground in park «Shovkovichnyy» was designed by the children themselves. Children were sculpting slides from plasticine, painting on the models, developed by our architects. After this workshop, our architects collected all the children's ideas and developed the final conceptual playground.
