

02 Project name: THE BRICK BENCH

Location: Charlotteager, 2640 Hedehusene-Denmark (55°38'55"N 12°12'59 E)

Completion year: 2017
Co-Created by: Den skabende by

Urban Co-Creation

Mursten layout diagram +0.900
SKALA 1:20 (A3)

Pupils from The Charlotte School show the Mayor how to make bricks and help him engrave his name in the clay.

The hard process of choosing is part of the co-designing process – here with a group of pupils.

Co-creating The Brick Bench

The Brick Bench was designed and built by the residents of the social housing area. But before the bench itself residents created their own bricks in a public workshop to honour the local history of the brick industry. From the ideas of the residents a professional drawing was made and local businesses and craftsmen were involved in order to bridge the gap between the town and the social housing area.

The youth building together with the local mason

The bench is being built by masons assisted by the residents. Here the bricks with the names engraved are being placed as part of the bench.

Engraving names in the bricks.
