Restructuring of the site & garden, Hôpital Necker Enfants Malades, Paris, 2004 / 2018

The new public space between street, hospital main entrance and garden.

The urban green-house device on the rue de Sèvres allows a strong visual relationship between the public space, hospital reception areas and the garden.

The new pedestrian walkways connecting the streets of Vaugirard and Sèvres

The new public space between street and hospital

The garden in front of the cafeteria located in the historic building

« I made this painting to amuse the sick children, now and in the future » Keith Haring
