LA VILLA COMUNALE

Teramo Town Park of Teramo is a major cultural asset and as such it is dealt with the redevelopment project. The Villa has had a significant role in the design of the city. It preserved, in part, the memory of the previous, rich, woody plant formed when the places were botanical garden. From the research in Teramo’s Town Archives and at the Provincial Library M. Defico, they emerged very interesting materials that draw a picture of the Villa full of forms and memories that all together, despite the changes and reductions, allow us to understand the territory and its urban development.
