

Cathedral Square, handrail detail

Henrietta Street

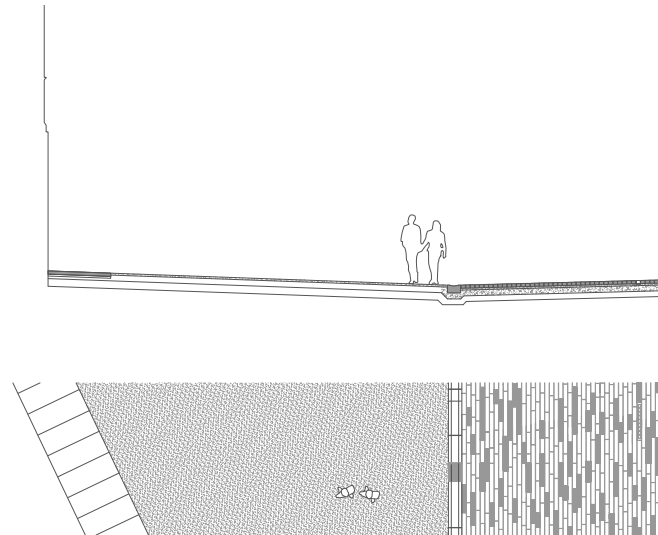

Cathedral Square, Flat threshold between footpath and carriageway

3 Bishop's Palace Square

Bishop's Palace Square is of particular importance as a gateway to the Viking Triangle from The Mall. The proposal was to make a new limestone terrace at the eastern end of the Bishop's Palace that would act as an animated space to attract visitors across the Mall from Waterford Crystal. This space is raised to the level of the Bishop's Palace and has public seating as well as terrace space for the Museum Café
