AALBORG WATERFRONT II

The master plan for the second stage of Aalborg Waterfront is based on the principles from the first stage, with the promenade as a unifying element. It has also drawn inspiration from the meeting between the dunes and the flat foreshore.

The lodestar of the proposal is a coherent town plinth. The plinth forms a raised base which unifies the area's distinctive, freestanding buildings. In this ensemble, the plaza around the Musikkens Hus concert hall is highlighted by an independent, rectangular plinth.
