

A pavilion in the park

is for patients in the palliative care unit, family members, caregivers and visitors. It creates with the surrounding newly designed space a „beautiful place“ with a pleasant atmosphere. Private and public subtly touch. This social project was designed by students of the Architecture Master's Degree Program at the FH Kärnten (Carinthia University of Applied Sciences) in Spittal as a Design-Build Project 2014 – 2015. It was fully planned and mainly executed through their own work.
