

J150

BolDuc is known as The Office of the Future. It is a beautiful characteristic office building, ideally located at the highway A2 in 's-Hertogenbosch. The office building was already archived in 1995. The owner of the site decided in 2014 that it was time for a full upgrade of the building but also the outdoor space. Till this upgrade the outdoor space was completely dominated by traffic and had very little residential quality.
