

J150

Led by project manager Sander Scheepers from vb&t, Esther Kruit of KruitKok Landscape Architects made, in close consultation with architect Wim Lindenbergh Studio Y, a design for the outdoor area. One of the main ideas for the site was to create 'nests; distinctive and intimate seating areas equipped with all facilities.

In the run-up to this project Grijzen had close contact with Sander Scheepers and Esther Kruit and, from the client Achmea Vastgoed, Jeroen Rutsen. This close contact was mainly about how we could transform the sketches into a feasible and affordable design. Together, we have designed the unique seating elements that fulfill the needs and demands of the user, are comfortable and fits in the environment. BTL was responsible for the implementation of the work.
