
1. Historic City

2. River Yantra

3. Art Gallery Boris Denev

4. Antiroom

5. Forest

A particular urban aspect of the city is being as well crossed over in its center by the river Yantra and lying on three different steep hills. This creates many great panoramas of the surrounding nature, but separates physically the city from the forest, causing the decay of the second. The pavilion is therefore intimately located at the junction between history and nature, trying to reconnect the two.
