SOME OF THE ACTIONS CARRIED OUT ARE:

- The pedestrianization of spaces reserved for cars and the conditioning of cycle paths.
- The recovery of the previously existing riverbed that takes clean water from the river Biala, preventing this form entering the sewage system.
- The installation of sustainable drainage systems enhancing natural rainwater purification.
- The planting trees (native species) along the new riverbed and associated with pedestrian spaces.
- The installation of a new lighting system following Starlight criteria.
- The installation of a green façade in the energy rehabilitation of the Europa CEC.
