ASSESSMENT OF WORKS

These works organise the public space of a section of seawall promenade where there is a large density of elements. The goal is to unify the city planning criteria and widen the section to be able to develop the uses traditional of a seawall promenade, thus providing a correct use to the public space.

This section, along with incorporating a tired area around the Guaita Tower, links the connection between San Juan Beach and the Montgat town centre be strengthened, as well as the connection to the sections of the promenade executed earlier. These types of works are necessary to obtain high quality spaces for leisure on the seawall.
