Mission of urban and/or architectural project management by Ateliers Lion associés, representative: Ateliers Lion associés, representative

The Cité de la Méditerranée development covers 60 hectares out of the more than 480 hectares of development in the EuroMéditerranéen project as a whole.

Lying within the 60 hectares, the Boulevard EuroMéditerranéen designed by Les Ateliers Lion Associés and Ilex et Kern et Associés has transformed the seafront over a distance of 2.5 km from the CMA CGM Tower to the Old Harbour.

This was a major urban challenge, revitalising the city centre and harbour by recreating connections between the two sites. The new urban promenade, Boulevard EuroMéditerranéen, offers new landscaped areas for the public and vast pedestrian spaces.

With the renovation of Boulevard du Littoral, Place de la Méditerranée, the J4 esplanade, the inner harbour, the Jardin Vaudoyer and Place Albert Londres, the work is currently valued at M€ 58 + VAT.
