project idea: ARTIFICIAL SANDY AREA

The main goals of the project include creating a beach atmosphere and incorporating nature into the urban environment. The use of artificial sandy areas is intended to create a sense of tranquility and relaxation, while the incorporation of greenery and water features aims to enhance the aesthetic appeal and provide opportunities for recreation.

1. GEOMETRIZING A TIDE

- Memory of the place: natural tide
- Where floating boats appear: docklands
- Navigating a distant past: artificial tide

2. ROCKS

- Include the gardens and protect the area from the traffic

3. NATURE IN SANDY AREAS

- Various indigenous and non-indigenous species
- Diverse flora and fauna
