

Dear author of the project.

You have wilfully taken our parking spots, where there is nothing going on, they are empty, because Slovak nation is obedient and fearful. The parking lot is empty, thus you can begin with your project - I have my own opinion on that. I am proud Slovak, I come from Terchová. I love nature and I admire folk architecture. Your folk architecture monument is pathetic. It belongs to the bosom of Slovak nature, to the outdoor museum, to the beautiful Liptov nature, for people to admire it and respect our ancestors. And not shamefully on panelák (block of flats), in the city! Your project is deranged, or it is us who is deranged. I leave to the judgment of people, who slowly come to their own opinions about everything that takes place around us.

Thank you and have a nice evening.

Hi Tomáš,

I will not fall asleep until I write you. Congratulations, Tomáš, to your successful project. You are number one, I have been rooting for you the whole time. It was right after my night shift, but I haven't slept. I have been watching the whole time and hoped you would succeed. You are the man and I wish you luck with your next projects, may they be as marvelous as drevenice (log houses) and I want to thank you for the view in the time of my rest. Drevenice remind me of my childhood, memories of my beautiful native region, that is so close to me now. I wish you a lot of success in your work; never give up.

Good luck. Have a nice evening.
