

**3 - LUNGO RENO NAVILE:
CURRENT USE AND FUTURE
IMPLEMENTATION**

The Navile urban area has long been a site for activities and for local group and association gatherings. There are now new important opportunities, linked specifically to the canal. The activities being promoted along the route are many and varied, helping the path's vitality and development as a part of the urban landscape. The project was based on citizenship engagement, depending on cooperation in the maintenance and promotion of the new public spaces. This project is one of a more general effort to recover and reclaim Bologna's watercourse. The signage system is now being developed.
