

# REDEVELOPMENT OF 'S-HEERENBERG CITY CENTRE

## THE NETHERLANDS

### 'LONG-CHERISHED WISH'

The design for the square is divided into different spaces, a square with parking between the trees and an attractive place to stay. A strong composition in the pavement connects both parts and green areas surround the parking. While residents and tourists can stay and enjoy a drink or snack, the children can play in the play area. The water element on the square can also be used as a stage, enhancing the use and atmosphere on the square. According to the councillor the redevelopment of the Stadsplein is the 'icing on the cake' of 's-Heerenberg's master plan and is a 'long-cherished wish' come true.

### CLIENT

MUNICIPALITY OF MONTFERLAND

### DIMENSIONS OF AREA

2 ha

### BUILDING COSTS:

€1.800.000

### DESIGN: 2011 - 2013

BUILT: 2013 - 2014
