

BICYCLE LANE-PLANTS PARTERRE CROSS SECTION

## PARAL·LEL COLUMN

## ASSESSMENT

The remodelling of Paral·lel Avenue represents the first step to revive the human nature of the surrounding area. New spaces in which to meet and chat are gained, with urban furniture strategically laid out, encourages holding activities in these public spaces.

The large pedestrian and bicycle crossings, the relocation of the bike lane and the new median plants have managed to bring the pavements on both sides closer together, inviting pedestrians to cross and adding a touch of warmth. The new bike lane is clearly defined and protected along the entire avenue. Finally, the placement of the Paral·lel columns considers the needs of future smart city developments and ties all the works together in a striking unified way, with elegance, rhythm and order that is highly attractive to residents.

We shall expect that citizens take on these new spaces on the roadway as their own and that they fill them with activities, to be able to see the full plenitude of Paral·lel Avenue.
